INTERTHERM®

High-Efficiency Gas Furnace

NORDYNE INTERNATIONAL

ENERGY STAR

Exclusively made for International Markets.

All Intertherm furnaces are built using proven technology and reliable components protected by our heavy-gauge, scratch-resistant cabinet. The SmartLite® control board used on all of our gas furnaces helps extend the life of igniters in furnaces using hot surface ignition technology.

All 80% efficient furnaces include a heavy-gauged steel heat exchanger for durability. And our 90+ AFUE furnaces include a stainless steel secondary heat changer that comes with a 10 year limited warranty.

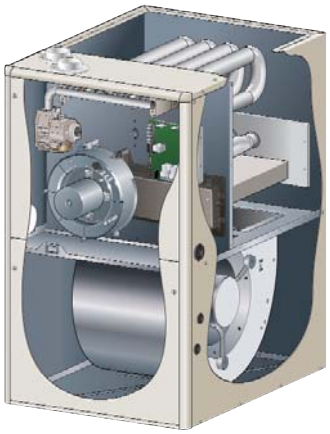

Intertherm furnaces and its mechanical and electrical components are 100% fired and tested on the manufacturing line to ensure reliable performance.

80% and 92.1% AFUE Single-Stage Gas Furnaces

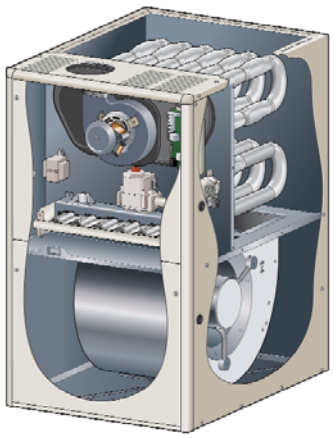

Like all Intertherm products, these Single-Stage, Fixed Speed gas furnaces are built using proven components for reliable performance. A fixed-speed, single stage furnace is designed to meet basic heating needs with the best value. All Intertherm furnaces are less than 35 inches tall, so they can even accommodate small spaces.

The Intertherm Single-Stage 80% gas furnace offers high efficiency, and great for any home with a gas furnace need. In fact, they are ideal for locations with shorter heating months. However, if you have the need to run your gas furnace for multiple months and are looking to reduce your energy consumption, then the 92.1% AFUE furnace maybe ideal for you. Gas Efficiency is rated in terms of AFUE (Annual Fuel Utilization Efficiency). The higher the rating the more efficient the system.

INTERTHERM®

92.1% AFUE

80% AFUE

What is AFUE? Annual Fuel Utilization Efficiency is the term used to rate the efficiency levels of a Gas or Oil furnace. The higher the AFUE rating the more energy efficient your system is and the lower your energy costs will be. It measures the amount of heat actually delivered to your house compared to the amount of fuel that you supply to the furnace. Thus, a furnace that has an 80% AFUE rating converts 80% of the fuel that you supply to heat - the other 20% is lost out of the chimney. Compare this to an older furnace that may only deliver 60% efficiency.

Features & Benefits

- Intertherm furnaces feature a SmartLite® Control Board to increase the life of the igniter beyond the standard 20-year life expectancy. SmartLite learns and adapts its ignition process to the furnace as installed in your environment.
- Cabinet is fully insulated to shield operation sound making this furnace one of the quietest available today. Its Silicone-protective polyurethane coating resists scratching and prevents rusting to keep your furnace looking new for years to come.
- Intertherm furnaces come ready to add other Intertherm accessories like programmable thermostats, whole-home humidifiers, air cleaners, HEPA systems and more. If allergens, dust, mold, pet odor, dry air, temperature control etc. is a problem for you or your family members, ask your dealer how he can design a Intertherm system to reduce common irritants, and increase comfort throughout the home for everyone.

Standing behind your investment - All Intertherm furnaces offer a 10 year limited warranty on heat exchangers and a 1-year warranty on all parts. Your contractor can help you decide what furnace is best suited to meet your needs.
